

ABSTRACT

Method for multi-coat refinishing of substrates comprising the
5 following steps:

- A) applying a first coat of paint consisting of a solvent-based colour- and/or special-effect-imparting coating composition to a substrate precoated with a primer and/or a filler and/or further coating compositions,
- B) applying a second paint coat consisting of a water-based colour- and/or special-effect-imparting coating composition to the layer
10 obtained under A) and
- C) applying a clear lacquer coat consisting of a transparent clear coat to the paint coat obtained under B).
